

The background of the slide is a microscopic image of a tissue section, likely stained with hematoxylin and eosin (H&E). The image shows various cellular structures, including nuclei stained in shades of blue and purple, and cytoplasm or extracellular matrix in lighter blue and white. There are also some orange-brown spots scattered throughout, possibly representing lipid droplets or specific cellular components. The overall texture is complex and detailed, typical of a histological slide.

BiInnovation Institute

BII

BiInnovation
Institute

Vision

Our *vision* is to support world-class life science innovation that drives development of new solutions by early life science start-ups for the benefit of people and society.

Mission

Our *mission* is to incubate world-class life science and catalyze its commercialization of new solutions through start-ups by using our knowledge, network, funding and infrastructure.

BII is a private not-for-profit
Institute for supporting Life
Science Innovation

BII team of 50 people supports start-ups with knowledge, networks, financing and infrastructure

BII has granted 72 MEUR to 80 early-stage life science startups since 2018

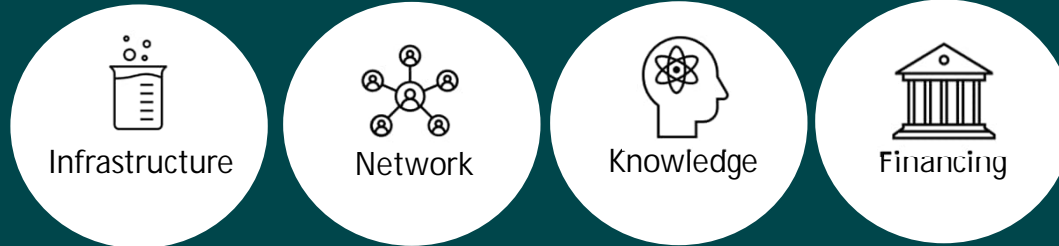

BII companies have already raised >410 MEUR in financing

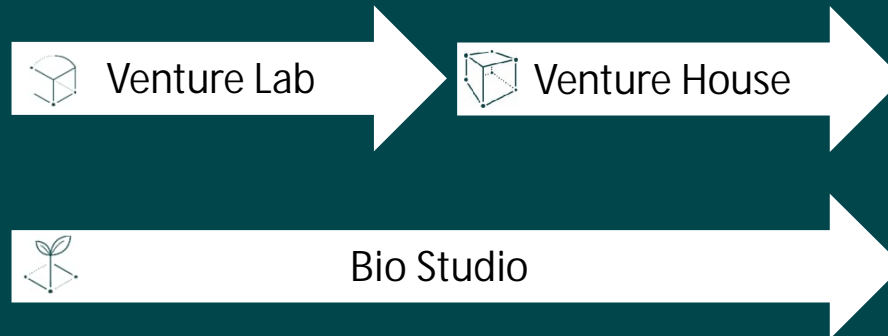

The Novo Nordisk Foundation funds BII with 470 MEUR over 10 years

BII offers

..through our programs

Technology maturation level →

Universities,
Hospitals,
Industry &
Innovators

Viable life
science
start-ups

We select promising start-ups and projects and support them by offering four essentials for success

Knowledge

BII team supports business development with knowledge and mentorship.

Network

We provide access to an extensive investor and collaborator network.

Funding

We provide funding through our programs to accelerate commercialization.

Infrastructure

We provide access to our community, offices and lab facilities.

Overview of BII's programs

Venture Lab

Venture Lab is designed to help start-ups in the early phases including a structured acceleration project

- Convertible loan
- 12-month program
- 20 companies/year
- Open calls twice a year

Venture House

Venture House is a follow-on program to Venture Lab focusing on fundraising and scaling readiness. Convertible loan, 18 months, 10 companies/year, internal calls for Venture Lab companies

Bio Studio

Establish spin-out companies based on transformative research via structured company creation Grant, up to 3 years, 5 projects/year, strategic calls and direct scouting

BII startups come from 8 different countries: Denmark, Germany, Sweden, Finland, Netherlands, UK, Switzerland, US

Our startups are in therapeutics (50%), health tech (25%) and planetary health (25%)

BII's Beacons: areas of unmet needs where BII can have focused and significant impact

Human Health

Deliver meaningful solutions for women's health and gender medicine.

Defeat cancer and its complications

Reduce the burden of inflammation and immune-mediated diseases

Improve outcomes in metabolic diseases

Diminish the threat of infectious diseases

Resolve diseases of the nervous system

Planetary Health

Provide healthy and sustainable food

Advance regenerative farming by applying biotechnology

Create a cleaner future by mitigating carbon emissions

Develop sustainable materials and chemicals

BII has already created significant results for early-stage life science entrepreneurs

80

Startups through our programs

412_M
